

## THE WISDOM IN SAVING.

Man who saves a dollar is a benefactor; one who teaches another to save a dollar is a public benefactor and should be knighted. A dollar put in the bank at compound interest takes time, it is not parched or burned by drought; not killed by frost. It cannot be injured by heat or by cold, by famine or by flood. It will not be lost through a hole in the pocket nor borrowed by some pestilential friend or boon companion. It is not the reach of earthquake or lightning, accident, sneak thief, or murderer. It works for you by day and by night, Sundays, holidays and week days are all the same to it. It will not rust nor be eaten by worms. It will sprout and mature a crop of interest every year throughout all eternity and then be as fresh and ready to go on working for you and your descendants as the first dollar first carried to the bank. It will be a share that neither sickness nor sleeps, nor dies, and needs no overseer.

The investment of money in a savings account at the bank at compound interest is the best investment, the most profitable business and the greatest and grandest speculation that I know anything about.

## FUNDS WILL PROTECT FOREIGN INSURANCE

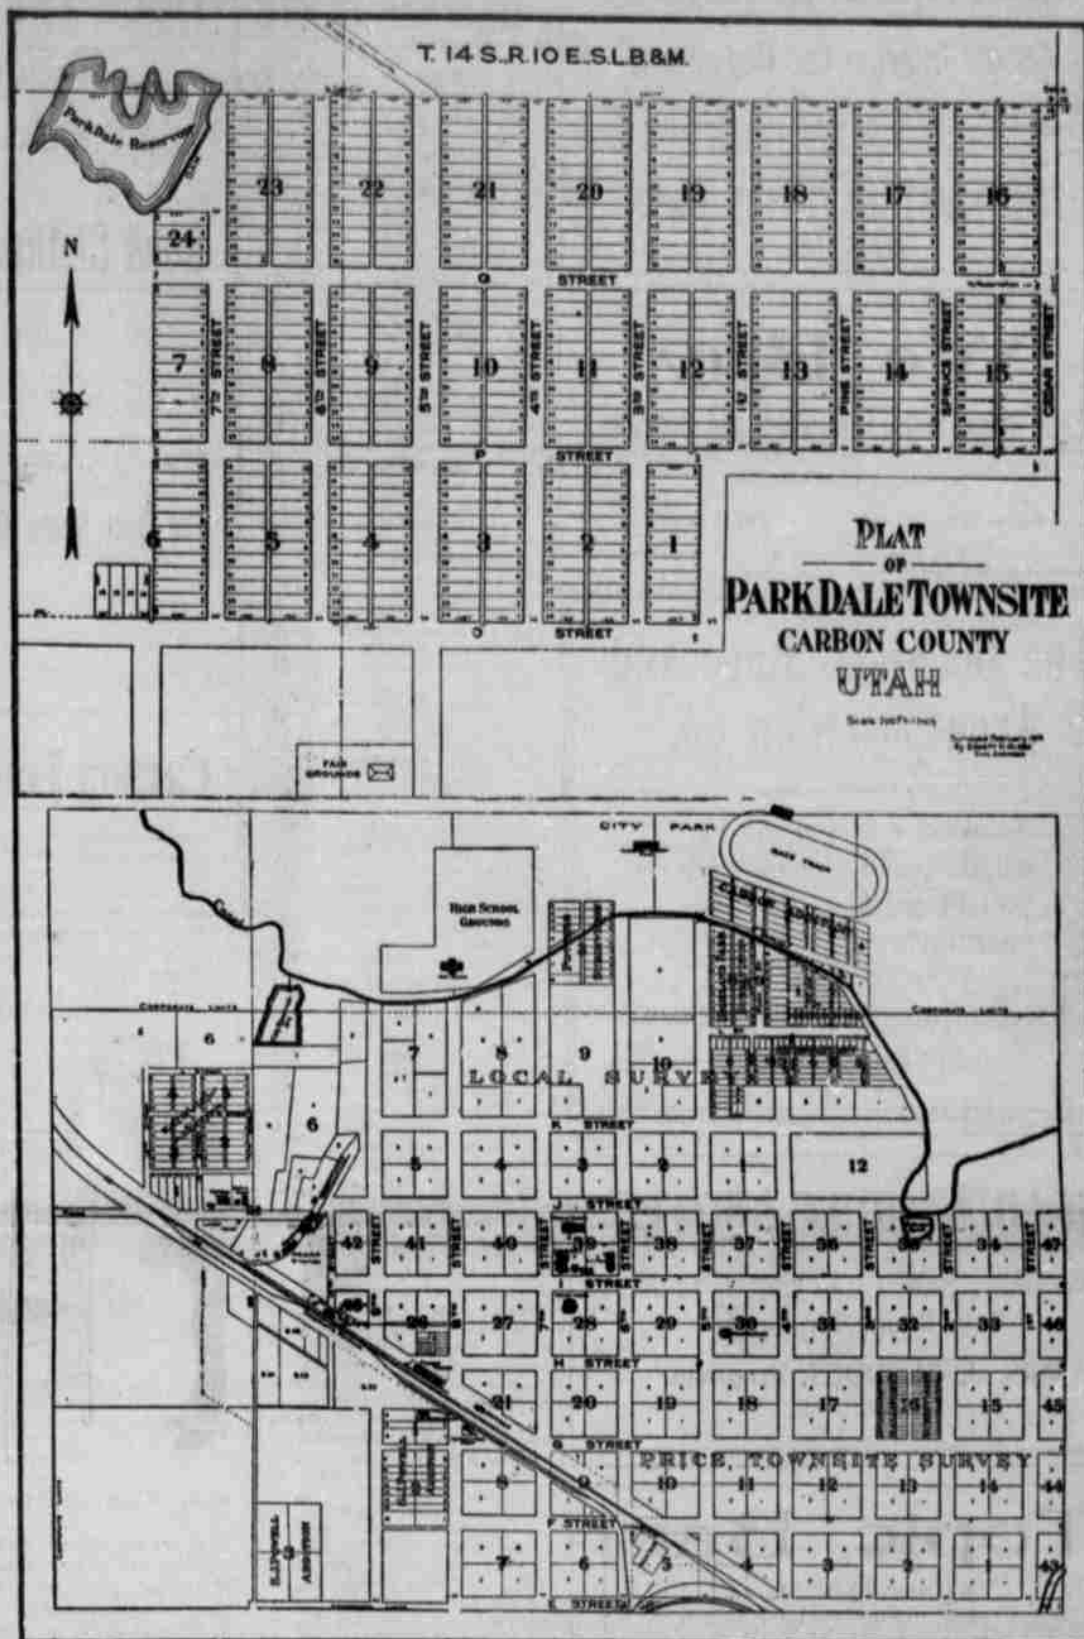

Insurance Commissioner James makes the statement that the present war crisis will have little or no effect on the United States branches of foreign insurance companies.

"I am in receipt of advice," he says, "giving every assurance that the policyholders in both the European fire insurance companies and European casualty insurance companies have sufficient funds on deposit in this country to carry them indefinitely."

There are not to exceed, however, a dozen foreign insurance companies doing business through agents at Price and elsewhere in Eastern Utah.
